

Engineering Internship Cover Letter

Hi Team / <Name>,

<xxx> Company has been a household name since <xxx>. I am thrilled to know that there is an internship program in <xxx> department. I am confident that I have the relevant skills to be the right fit in your organisation.

Relevant experience:

1. I have been part of the innovation team right from the first year of college.
2. Also, I have volunteered with projects for automotive and airborne devices projects this year.
3. I have also worked with <xxx> company for a Summer Internship Program exclusively for students of my University. I was one among the five selected for the program.

I look forward to a rich learning experience with an industry leader like <xxx> Company. I am willing to relocate for the period of my internship, if required.

Thank you for your patience and understanding.

Regards,

<Name>
